

ELITE LAVAmag 60

Machine particularly suitable for sharpening workshops. Its dimensions allow the quick and easy cleaning of circular saws, cutters and small blades.

Solid structure made entirely of 2 mm stainless steel.

The Elite LAVAmag 60 provides a tool cleaning system which is the most aggressive washing system therefore also the one that best cleans. Discs or tools are completely immersed in the tank and the wash cycle is activated, which consists of water temperature (about 60°C) and ultrasound vibration.

If the tool, for example a disc, can not be completely submerged, one half of the disc can be washed in one wash cycle, and in the next cycle wash the other half. a quick and easy way.

Insert the tools in 5 to 10 minutes and remove them completely clean.

SPECIFICATIONS

Technical data

Internal dimensions	ø450x300x450 mm.
External Dimensions	ø610x460x600 mm.
Digital generator	
Generator power	1000 W
Heater power	1500W
Water temperature	adjustable up to 60°C

Available versions

Model	Net size	Packing weight
LAVAmaq 60	610 x 460 x 600 mm.	55 Kg.

HIGHLIGHTS

- Made of high quality stainless steel plate with a thickness of 2 mm.
- Water heating temperature adjustable up to 60°C
- Timer for automatic machine shutdown
- Tool holder included
- Emptying system for quick and easy change of the liquid

We reserve the right to make design changes in the interest of technical progress.
