

ELITE LAVAmag 780

Cleaning, drying and corrosion protection in a single process

Complete cleaning of the tools with automatic drying

Maximum Load: 150 Kg.

Máx. 1 stack of intermediate size saw blades

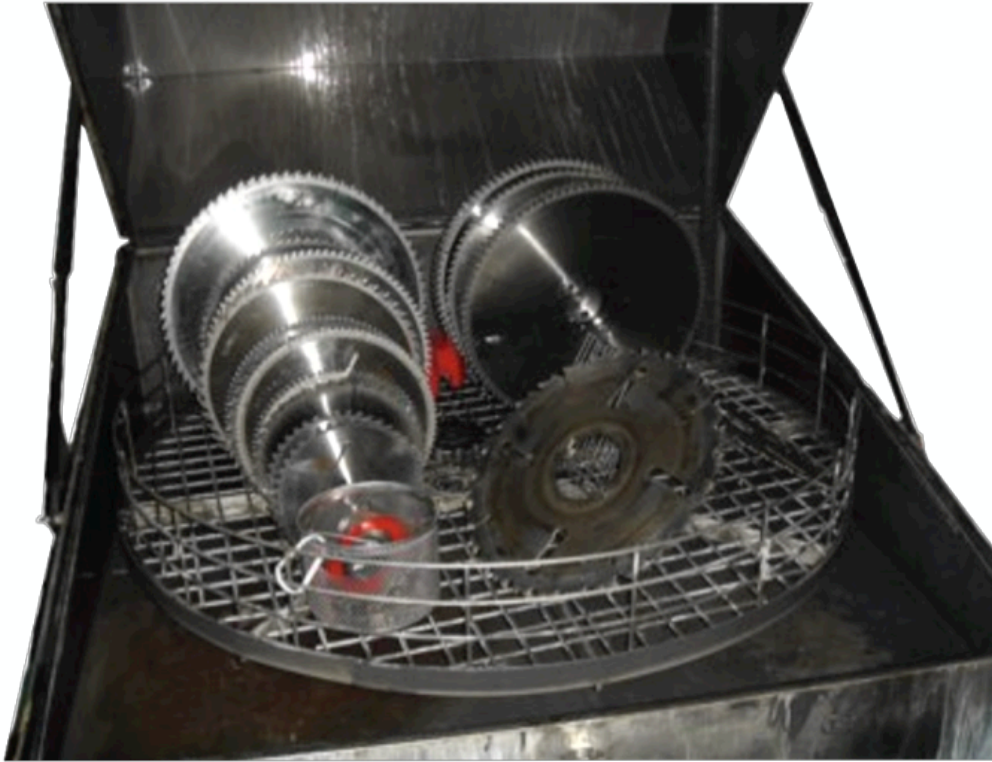

The Elite LAVAmag 780 provides a tool cleaning system that will save you a lot of operator time. Insert dirty tools such as circular saws, blades or milling cutters into the machine and within 10 to 15 minutes they will be completely clean, dry and protected against corrosion.

The cleaned tool is ready to be introduced into the grinder without contaminating the coolant.

It allows to clean saws and tools up to a diameter of 750 mm.

You can also insert the already sharpened tools for 1 minute so that they receive a corrosion protection that is completely dry and unnoticed.

Loading of tools

Circular saw blades cleaned

Optional accesories
